COMPETENCE, INNOVATION AND QUALITY TO THE SERVICE OF THE CLIENT

Innovation, ability to work in teams, constant investment in training and long term vision, are the key principles that guide us every day since our foundation, in 1966. In those years we were a promising enterprise, created to offer a qualitatively competitive response in electrical systems', which was already showing broad prospects of development: this is why we are called Eurogroup and we are leaders in the design and building of electrical and technological systems.

A role gained in time, thanks to an ongoing and unstoppable process of growth, that projected us in the national and international scenario which made us become, in 1996, Eurogroup S.p.A. Since then, know-how, competence and professionalism, allowed us to get a large Customers' base that relies on our services since more than 50 years.

OUR BUSINESS UNIT

The investment in quality and innovation is an impulse that led us, in recent years, a steady growth both in terms of services offered and in terms of reference markets, which make essential the strengthening of our organizational structure and the beginning of a process of internationalization.

Our service and product range is constantly evolving, as the markets we address. To best meet the needs of Customers, through a punctual and professional service, it is our main objective and we want to assure it all over the world.

OUR CURRENT CERTIFICATIONS
